HASTI TORBATZADEH

SOFTWARE TECHNOLOGY ENGINEERING STUDENT

Aspiring Full-Stack Developer

PROFILE

Third-semester Software Technology Engineering student at VIA University College with hands-on experience in full-stack development, databases and distributed systems. I enjoy turning ideas into reliable applications that people can use. Seeking a minimum 20-week software development internship starting in August 2027.

EDUCATION

Software Technology Engineering

AUG 2025 - EXPECTED 2029

VIA University College, Horsens | 3rd semester

Relevant coursework: Java, C# and .NET, databases and SQL, web development, networking, distributed systems, algorithms and data structures.

EXPERIENCE

Warehouse Picker, Part-time

JAN 2024 - PRESENT

Salling Group Terminal, Vejle

- Pick and pack orders accurately while meeting quality, productivity and safety requirements in a fast-paced team environment.

Student Tutor

AUTUMN 2026

VIA University College, Horsens

- Welcomed and guided new students, organized introduction activities and explained university systems and practical information.
- Supported international students and collaborated with other tutors to create a welcoming experience.

SELECTED PROJECTS

Eleven22 Exotics

PERSONAL FULL-STACK PROJECT

Luxury car rental platform built with Java, Spring Boot, PostgreSQL and vanilla JavaScript. Includes JWT authentication, customer bookings, an admin dashboard and server-side booking-conflict prevention.

Food Waste Redistribution Platform

ACADEMIC GROUP PROJECT

Collaborated on a Java and PostgreSQL client-server application using sockets, concurrency and layered architecture to manage food listings and reservations safely.

Gym Management and Booking System

GROUP PROJECT - IN PROGRESS

Developing a distributed Java and C# system for member bookings, waiting lists, trainer plans and administration. Planned completion: December 2026.

Study Planner

PERSONAL FRONTEND PROJECT

Responsive task-planning website built with HTML, CSS and vanilla JavaScript. Supports task management, filtering, sorting, progress tracking and browser persistence with localStorage.
